Re: Atlantic City Electric Company Transmission Circuit 2317

Dear Customer,

At Atlantic City Electric, every day we are working to provide clean, safe, reliable and affordable energy service for you. This letter is to inform you that we will be performing maintenance, repairs and/or replacement work to energy infrastructure and utility poles along our transmission line rights-of-way in close proximity to your home. A portion of this work may require tree trimming and vegetation management, mowing or brush removal on or around your property.

As always, the safety of our customers, communities, and employees is our top priority. Please be advised we anticipate performing this necessary work within the next few months. We would ask you to please remove any personal items that may be in our existing rights-of way so our crews can effectively and safely work in this area.

We appreciate your patience and understanding as we work to further improve your service. If you have questions or would like additional information regarding this reliability enhancement work, please contact me at 609-625-6372.

Sincerely,

Shawn D. Gray
